Carl Kammerling

International

Brand Innovation

Carl Kammerling International have been in the business of tool making and distribution since 1790, when P.L.S (Peter Ludwig Schmidt) was established. We've been at the forefront of technological and industrial changes and challenges ever since, determined to innovate and improve our products based on the needs of the market.

Simple, streamlined, and economic by nature, we strive to develop items that aren't only reasonably priced, but represent genuine value, for our customers and end-users.

Since the foundation of CK in 1904, the company has established an unrivalled reputation for quality and innovation. As the brand and business have grown, new additions to the Carl Kammerling International family have contributed to these core values, placing professional needs at the heart of growth.

We are, at heart, a family business, now being led by the fourth generation, and as such, we value quality, longevity, and expertise. A classic example of the German mittelstand business model, our core values reflect a culture of respect, of looking to the future, and of steady, sustainable growth. While remaining large enough to adapt to a rapidly changing marketplace, we've stayed small enough that our customers still have designated points of contact and real people to reach out to.

From our UK headquarters in Pwllheli, international office in Wuppertal, Germany (the heartland of German toolmaking), our sales teams in the UK, Eire, France and Germany, and a network of distributor partners, we have established a position among the top hand tool brands in more than 40 countries.

Smarter by design

C.K. Magma combines optimal functionality with creative flair to deliver an eye-catching range of premium storage and accessories that are truly smarter by design. C.K. Magma products are designed to get the job done, without compromising on practicality and quality.

Developed in collaboration with trade professionals with easy access and convenience in mind; with C.K. Magma, every tool has a place, and there's a place for every tool.

Traditionally crafted tools

C.K. Classic products reflect the heritage and quality associated with all Carl Kammerling International brands. A range of dependable garden tools and durable hardware products that combine traditional manufacturing methods with the latest technology and C.K.'s reputation for innovation. Our Legend range combines hot-dropped forged blades with hardwood handles, while our Maxima caters towards those needing lightweight, wear-resistant pieces, with extra grip and support.

All C.K. Classic products are meticulously crafted using traditional practices to ensure lasting performance and appeal to both the dedicated professional and DIY enthusiast; the first-time gardener to the seasoned horticulturalist.

Designed for professionals

For over 100 years, C.K. has been at the forefront of hand tool manufacturing, producing high quality tools that meet the most demanding needs of trade professionals. C.K. Tools is our signature line of products, engineered to offer leading performance, durability, accuracy, and strength, all of which are key requirements for professional results.

Not content with simply conforming to all relevant international standards, C.K. Tools work with metallurgical and design engineers to develop new materials, manufacturing techniques and finishing treatments to push the boundaries of performance.

Driven by research through an extensive panel of cross trade professionals, our tools are developed to assist with everyday tasks; an approach proven to produce innovative tools that transform working practices. Product development is generated by our UK-based team, and our core products are still made and sourced through Germany.

Our Brands

The CKI group includes a range of brands that complement our ethos of innovation, quality, and value. Each has a distinct personality and purpose, whilst remaining true to our goals and identity.

avit

» JOKARI® original

Uncompromisingly good

Carl Kammerling International is the exclusive UK distributor of Jokari, a leading German brand with 45 years' experience. Specialists in stripping and dismantling all types of wires, cables, and conductors, Jokari produce professional tools for all scenarios. Promising speed, ease, and safety, Jokari provide solutions for the demands of all professionals in the trade, the perfect partner to the C.K Tools range.

CLIPACORE

The clip release revolution

The Clipacore release system provides consistent results quickly! Compared to current core drill release techniques, our easy-to-use patented design removes the need for spanners and excessive force. We have taken away the frustration from components tightly locking up due to torque tension, leading to expensive damage to core pieces and power tools. Clipacore products are designed and manufactured in the UK, using high-tensile alloy steel.

Adaptable for use with the majority of the market's favourite drills, or as a complete unit. For workflow efficiency, the Clipacore range of products make an essential addition to the professional tradesperson's toolbox.

kasp SECURITY

Locks you can trust

Kasp locks are designed and manufactured to the highest standards. Precision engineered from premium grade materials, ensuring exceptional strength and outstanding reliability. Kasp locks are renowned for being locks you can trust, from combination padlocks to high-security, hardened-steel options.

To maximise sales potential, the Kasp range is supported by strong POS and merchandising solutions that stand out. The colour-coded packaging is designed to be informative to assist in selecting the correct products for any security requirement.

Quality control

The CKI Quality Policy is available on our website and guarantees the standards we insist upon for all our products, establishing a culture of communication (from our users and employees alike). Consistent monitoring and reviewing of our products and processes ensures that this culture persists, and that not only do we meet all relevant operational standards (we have been ISO9001 compliant since 1991), we surpass them.

Product innovation

New and innovative products are a cornerstone of CKI's identity. We pride ourselves on developing products and ranges inspired, and requested, by our customers and end-users. When our customers face an issue, they can rely on us to identify and solve it. We are driven by a product ethos of innovation, quality and durability, and our product development is the lifeblood of the brand.

Backed by extensive research and a deep understanding of the profession, hard-won over the course of a century, our tools are conceived in collaboration with trade professionals, and are developed by embracing new technologies.

Free online training

Productwise is a unique, free of charge service provided by CKI. Our video tutorials provide industry-standard training for best-practice in using our tools and equipment. Users can select modules and earn certificates, demonstrating their progress and expertise.

For those studying, Productwise is a great insight into product-specific training; from our end-users already in the trade, to counter staff in stores, it offers a valuable opportunity for development, ensuring that the newest technology is as accessible as possible for users at all levels.

Bright Sparks

At the heart of CKI is our vision for the future, and we see no better investment in that future than by investing in the apprentices who will go on to use our tools for the rest of their careers. Every year, we provide 60 colleges across the UK with free-of-charge tools, and demonstrations on how best to use them. The Bright Sparks scheme, founded in 2003, was the first programme of its kind, and has supported over 50,000 students through their education and into their chosen vocation.

PR, social media, and advertising

Your customers know us because we've invested in communicating directly with them. End users recognise us from our consistent online presence across social media platforms, where we have worked hard to build genuine communities for our customers and users.

Alongside our online presence, we invest in traditional media targeted at professionals. Appearing in trade-specific publications allows us to target end-users and assist them in contacting their most convenient retailer: our customers.

Finally, our presence at some of the industry's most popular trade shows means that end users get to know our products, and team, in person. We offer in-person product trials and demonstrations, and members of our sales, marketing, and product development teams are on hand.

Every interaction and encounter we have drives brand loyalty, builds excitement around products, increases brand awareness, and reiterates CKI's consistent presence in an ever-changing market.

Stockist support that sets us apart

Exceptional service

Same day dispatch and next day delivery for mainland UK, 3 – 4 day delivery for Ireland and France with the rest of Europe receiving a 5-6 day service. Our state-of-the-art warehouse and excellent team boast a 98% fill rate, and a 96% OTIF rate (On Time, In Full). Our priority is that our customers get the goods they want, when they want them.

Merchandising and packaging

Our clear, informative packaging and easy-to-shop merchandising gives us instant, impactful, and recognisable in-store presence. We have invested in eye-catching merchandising to give customers a variety of options to create displays that suit their needs. Our regular promotions offer value to our customers, and theirs, ensuring footfall and returning custom throughout the year.

Online ordering

Our online order system empowers 24/7, self-serve purchasing, where our customers can create and manage their orders in the time and place that best suits them. Ordering before 3pm ensures next-day delivery to the UK mainland, and our real-time stock pricing information, order history and promotional deals are all available in one, convenient space.

Premium quality insulated screwdrivers

The C.K. DextroVDE Slim screwdrivers provide easy access to recessed screws. Eliminating the need to remove insulation and compromise safety, they are slim enough to fit into the tightest of spaces, yet still offer outstanding torsional strength and active torque feedback for an extended working life.

1. Slim shafted insulated blades - allow access to recessed screws and fixings.
2. VDE approved - individually tested to 10,000V for safe working up to 1,000V.
3. German manufactured - quality and performance assured.
4. Dual component, ergonomic handle - specifically designed for use by electricians.
5. Premium quality chrome vanadium steel blades - for exceptional strength and durability.

Conforms to IEC 60900. Approved and independently audited by the German VDE institute.

Next gen advanced technology

MightyRods PRO cable rods encompass a fusion of advanced technological features that deliver the ultimate in cable rod performance.

Improving on-the-job efficiency, MightyRods PRO cable rods get the job done.

100% SPLINTER PROOF RODS

SplinterSHIELD is an advancement in cable rod technology. The durable SplinterSHIELD coating fully encases the inner fibreglass rod to prevent harmful splintering.

UNSURPASSED STRENGTH

Through the use of an innovative triple fixing system, the super tough zinc-plated steel Mighty-Fix connectors offer unsurpassed tensile strength in excess of 275kg. Furthermore, the ultra-slim profile reduces snagging and provides accessibility through smaller holes.

MightyRods PRO

MightyRods PRO 12m Super Set

12 meters of 100% splinter-proof rods. 4 rod flexibilities for overhead, under floor, tight angled and obstructed runs. Super flexible, low friction, Spira-FLEX rod for tight angled access points. Glow in the dark phosphorescent GLO rod for guiding a run of rods in low light conditions. Accessories: flexi-lead (mini-flex), ring, hook, gender changer, flat bullet, domed bullet, in-line swivel, torch, magnet, chain. Cable Routing

Gloworm Cable Router

Ideal for running cables around tight corners, through insulation filled walls, underneath flooring and across ceilings. Natural curvature aids routing around short tight bends - can also be straightened out for straight line runs. Innovative glow in the dark phosphorescent polymer construction aids routing in low light conditions.

Item No.			
T5460	4m		5

Draw Tapes

SpiraFLEX Draw Tapes

Innovative spiral design significantly reduces frictional resistance allowing for longer cable runs. Manufactured from an advanced polyethylene terephthalate (PET) material - super flexible and immensely tough. Considerably less kinking and coiling compared to nylon and steel tapes. Compatible with C.K MightyRod accessories. Supplied within a protective impact resistant rewindable cassette.

Steel Wire Draw Tape - 50m

Superior quality draw tape. Steel core wire for exceptional tensile strength. POM (Polyoxymethylene) coating for abrasion resistance and minimal friction when pulling cable. Flexible head attachment for navigating conduit with multiple bends.

Item No.		Ø	
495055	50m (164ft)	5.5mm	10

POM Draw Tape - 30m

High quality draw tape constructed of three intertwining POM (Polyoxymethylene) strands. Helical tape structure for reduced friction and high tensile strength. Flexible head attachment for navigating conduit with multiple bends. Robust plastic casing for convenience during storage and transportation.

Item No.			
495056	30m (98ft)	6mm	10

Nylon Draw Tapes

Nylon draw tape for low friction and high strength during cable pulling applications. Flexible head attachment for navigating conduit with multiple bends. Red coloured tape for improved visibility in conduit with existing cables. Robust plastic casing for convenience during tape rewind, storage and transportation. Non-conductive properties for safe working practices.

The C.K ESD and Precision range is designed for professionals who need hand tools for ultra fine work, where use of intricate components or tight access are issues, for example in the electronics and fine mechanics industries.

The international standard IEC 61340-5-1 for protection of electronic devices from electrostatic phenomena prohibits the use of non-ESD (electrostatic dissipative) products in Electrostatic Protected Areas (EPAs). C.K offers a wide variety of hand tools in compliance with these standards.

What is ESD?

ESD stands for Electro Static Discharge.

ESD can cause unseen damage to electronic components during manufacture of electronic assemblies and equipment. If the damaged component fails immediately, the result can be a board that fails quality control tests and requires rework. This represents lost production and additional manufacturing costs.

Worse than this, a component may be partially damaged and weakened. It may suffer a change or drift in characteristics. It may remain within specification, but fail later when in use by a customer. It has been estimated that 90% of damages to devices may be incurred in this way.

In manual assembly most ESD arises from charged personnel, if they are not grounded.

One of the main principles used to protect ESD sensitive components from ESD damage is to only handle sensitive components in an ESD Protected Area (EPA) under protected and controlled conditions. An EPA is an area in which static electricity is kept below levels that could cause damage to electronic components handled within the area.

Precision box joint

The box joint construction of our pliers and cutters is a specialised technique which physically slots one half of the plier through the other. Although more difficult to manufacture, the doubly supported pivot gives smooth and accurate action, longer product life, and removes the requirement for readjustment.

Hot drop forged blanks

Hot drop forging gives maximum strength to our tools through optimising the grain structure.

Spot welded double leaf springs

Spot welded springs mean that no replacements or adjustments are necessary. The action of each pair of pliers will be consistent and controlled with no maintenance costs.

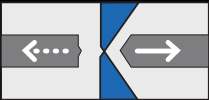

Cutting Edges

The geometry of the cutting blade affects both the cutting action and performance, and the lifetime of the product. The sharper the angle, the fewer cutting forces are generated. Reduced cutting forces not only lead to a smoother and easier feeling cut, but also limits potentially damaging pressure or 'cutting shock' to sensitive components. There is a trade-off however. The blade will wear more quickly and the cutting capacity will be lower.

Mini Bevel

- Standard cut.
- Highest cutting capacity.
- Robust and long lasting.

Full Flush

- Almost full flush cutting.
- Cutting shock slightly reduced.

Extra Full Flush

- Perfectly flush cutting.
- Suitable for non-shock cutting.

Mirror polished surface

The micro-fine steel surface provides an attractive finish with no risk of flaking chromeplating which could damage circuits and components.

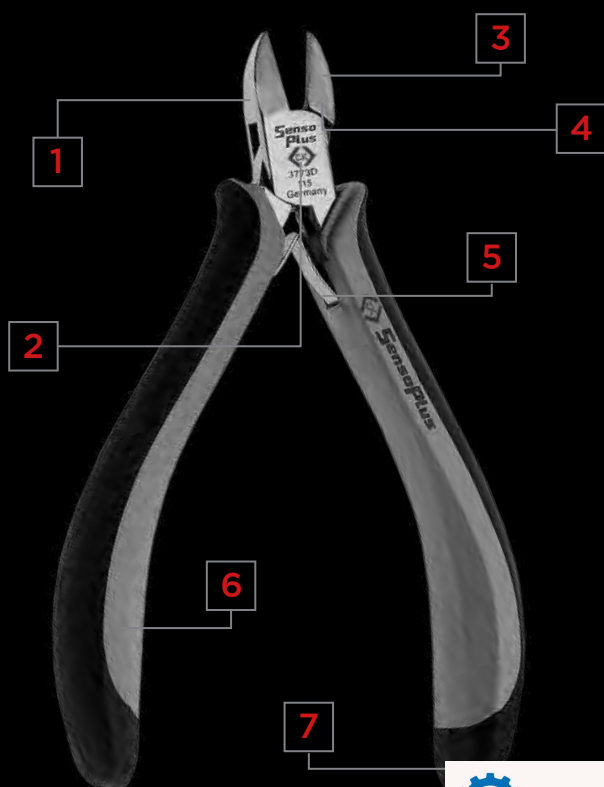

Careful choice of raw materials

We carefully select different high alloy carbon and chrome vanadium steels to match the varying demands of each product.

Dissipative precision pliers & cutters

1. Special alloy steel, drop forged, hardened and tempered for exceptional strength and durability.
2. Precision box joint construction for permanent, adjustment free jaw alignment.
3. Induction hardened jaws for outstanding long term performance.
4. Mirror polished surface eliminates the risk of damage from flaking chrome.
5. Spot welded double leaf springs for consistent, repetitive action.
6. Ergonomically designed dual component handles for increased comfort and control.
7. Fully ESD compliant for safe use on sensitive electronic components.

Dissipative screwdrivers

1. Ergonomic tri-lobe handle design for comfort and effective delivery of torque.
2. Fully ESD compliant for safe use on sensitive electronic components.
3. Toughened alloy steel blade for exceptional strength and durability.
4. Black anti-peel finish eliminates the risk of damage from flaking chrome.
5. Handle injection moulded directly to blade giving the ultimate bond for increased reliability and durability.
6. Precision machined tip for an exact screw fit and damage free screwdriving.

Holesaws

The ultimate in performance, reliability and output. One saw does it all. Cuts metal, wood, plasterboard and composites.

1. Vari-pitch tooth design optimised for a faster cut.
2. Location pins to avoid over tightening for easier removal.
3. Improved heat dissipation and slug removal access.

Holesaws

ProCobalt Holesaws

Premium grade 8% cobalt alloy steel construction for an extended working life. Excellent wear resistance even at high temperatures. For fast and clean cutting of metal, wood, aluminium, steel, cast iron, brass and plastics. Variable pitch teeth for rapid cutting action, efficient swarf removal and reduced vibration.

Water systems

The range of C.K. hose connectors is precision engineered to be long lasting and leak free. The fittings are solid brass, so are much more hard wearing than plastic systems and are rust resistant. They are compatible with all popular makes of hoses of both 1/2" and 3/4" bores.

1. Solid brass - tough and corrosion resistant.
2. Ball bearing locking - secure and hard wearing.
3. Threaded clamp for a secure fit to hosepipe.

Quadro

Jokari QUADRO Plus

QUADRO - the unmatched integration of four key functions: cutting - insulation stripping - twisting - crimping, with integrated locking mechanism to ensure an even, high-quality connection, the perfect synthesis of ergonomics and functionality for fast and precise crimping of connector sleeves in strip form. The integrated locking mechanism releases when the crimp stamp has reached the final position. Quick reloading of connector sleeves by switching magazines enables fast and efficient work with no adjustment necessary for different cross-sections. Working range: wires with insulation made of PVC from 0.5 to 2.5mm² (AWG 20 - 14). Wire stopper for perfect length. No adjustment necessary for different cross-sections. Twisting prevents the splaying of wire strands to enable easy insertion in connector sleeves. Crimping of insulated ferrules from sizes 0.5 - 2.5mm² (AWG 20 - 14). CONTENTS: 1 Multifunction Plier Quadro, 3 magazines with end sleeve strips in 0.5 / 0.75 / 1.0 / 1.5 and 2.5mm².

Core Drill Bits

XPRESSCUT Core Drill Bits

Across the range of sizes sold separately, the core bits have spiralled and slotted barrels, helping remove debris and increasing air flow to the cutting edge. The high quality diamond and UK developed metal bond system provides trouble free cutting for most UK building materials.

The Boss Drill

Manufactured from the highest quality using German engineering standards and components. The Boss cuts through bricks, concrete blocks and much more. Consistently delivering high cutting performances with safety constantly in mind. The unique quick release adaptor on the end of the drill allows for fast interchanging of core bits without the need for tools when used with Clipacore core adaptors. The quick release extension bar supplied with every drill ensures most wall depths can be fully penetrated with ease. CONTENTS: Clipacore Quick Release Drill Adaptor designed for interchangeable core bits. Variable Handle Adjustment on Collar. Powerful 2 speed gear box, 1,000 RPM / 2,000 RPM. Electronic Soft Start Temperature Control and Current Cut-Off. Mechanical Safety Clutch. Available in 230v or 110v. Quick release extension bar (supplied).

Core Sets

Duocut

Our easy to use design enlarges existing holes to a wide variety of diameters for a wide variety of applications, including: Upgrading boiler flues. Upgrading gas pipes. Upgrading waste pipes / soil pipes. Upgrading extractor fans. Upgrading condense pipes. The inner spring-loaded core bit provides easy removal following the wall's outer core scarring, ensuring perfectly symmetrical holes to one another. The larger outer core is quickly released from the drill / arbor adaptor (not supplied) by simply removing the Clipacore Clip.

Item No.	
QCDC	1

Condensemate

Clipacore Condensemate puts you in control when upgrading from overflow pipe to 32mm waste pipe (or larger). The 300mm long core bit supplied, simply inserts into the existing open 22mm - 25mm hole (pipe fully removed). Once the outer core bit has scarred the wall, the inner long core bit serving as a guide can be removed by hand. Our easy to use design ensures consistent symmetrical holes eliminating the risk of core bits skidding off course and damaging the wall. The inner spring loaded core bit removes the need for tools thus improving workflow efficiency every time. The 22mm core bit can also be used on its own (with our smaller quick release core adaptor) to prevent blowing the brick face or render wall, compared to using a 22mm SDS masonry drill bit on hammer action.

Item No.	
QCDCCON	1

Fluemate

Safe to use when working at height. Scars the wall symmetrical to existing flue pipe and avoids skidding off course. Can be used with a variety of commonly used core bits. Spring loaded barrel for fast removal once wall is scarred. Fluemate comes with a 1/2" drill/arbor adaptor, DuoCut adaptor with clip, compression spring, 94mm barrel guide.

Item No.	
QCFM	1

Extension Kits

Chuckaway Extension Kit

Chuckaway removes the common problems associated with chuck headed core drills: Chucks seize up over time. Chucks require a chuck key which may get lost. HEX arbors are at risk of shearing off on the flats in chucks due to vibration and coming loose mid drilling. Chuckaway can also be used with the Chuckaway extension bar to penetrate deeper walls. No chuck or chuck key. Quick and safe. Maintenance free. Quick release clip system. High tensile steel built to last.

Kasp Service Centre

Our Service Centre provides an array of services from simple key cutting to more complex master keyed systems. Ordering is quick and easy, with an average delivery time of just 2-3 days.

Express key cutting

Our express key cutting service allows additional keys to be cut for all Kasp padlocks.

Padlock cloning

Our Service Centre can custom-build additional padlocks to operate with an existing Kasp key.

Keyed alike suites

A wide range of keyed alike padlocks are held in stock, however, for increased security, we can arrange unique keyed alike suites.

Master keyed systems

Tailor-made master keyed suites can be created to meet individual requirements.

Padlock & key engraving

User's names or identification numbers can be engraved on both padlocks and keys.

Security rating

The Kasp classification system assists in the selection of the appropriate product. The scale runs from 1 to 15 – the higher the number, the higher the security rating. To further aid selection, ratings have been grouped into 3 general levels of security – low, medium, and high.

119 High Security Combination Padlocks

With its heavy weight hardened steel lock body, super tough molybdenum steel shackle and anti manipulation locking mechanism, Kasp 119 series padlocks are amongst the most secure combination padlocks available today. The hi-tech double bolted locking mechanism features a special anti manipulation system to protect the lock from being opened through intelligent manipulation techniques. The weather resistant electro-plated lock body with rust-free internal components and dual drainage system ensures that the Kasp 119 series is ideal for outdoor use. The Kasp 119 series are true high security combination padlocks, suitable for demanding industrial applications, whilst offering the convenience of a resettable keyless locking mechanism.

- Molybdenum steel shackle - extra protection against hacksaw and cropping attacks.
- Double bolted locking mechanism - extra resistance against torsion and pull attacks.
- Anti-manipulation locking system - protects against attacks.
- 4 dial resettable combination - for convenience and security.
- Rust free internal components & dual drainage system - resistance against corrosion.

130 Laminated Steel Padlocks

The robust design of this classic style of padlock ensures that it remains as popular as ever. The Kasp 130 series, with a hardened steel shackle, double bolted locking mechanism, paracentric keyway and anti-pick cylinder, combines the latest lock technology with a traditional style.

- Hardened steel - extra protection against hacksaw and cropping attacks.
- Double bolted locking mechanism - extra strength to resist torsion and pull attack.
- Zinc plated steel laminated body - extra strength and resistance to corrosion.
- 8 steel countersunk rivets (4 on 30mm) - extra strength over traditional locks.
- Anti-pick mushroom pins - extra protection against picking.
- Paracentric keyway - extra protection against manipulation.
- 2 keys per padlock.

135 Harsh Environment Padlocks

Designed for use in extreme weather conditions, the robust Kasp 135 series features a tough laminated steel body and chrome plated hardened steel shackle, totally encased by an impact resistant, weatherproof vinyl jacket. The durable 5 pin anti-pick cylinder is protected from dirt and moisture by a dust cap.

- Plastic coated hardened steel shackle - extra strength & resistance against corrosion.
- Plastic coated nickel plated steel laminated body - maximum resistance against corrosion.
- Double bolted locking mechanism - extra strength to resist torsion & pull attacks.
- 5 pin cylinder with anti-pick mushroom pins - extra protection against picking.
- Keyhole cover - Protects the mechanism from dirt and moisture.
- Paracentric keyway - extra protection against manipulation.
- 2 keys per padlock.

140 Solid Aluminium Padlocks

The Kasp 140 series is constructed from solid aluminium ensuring a high level of weather resistance. In addition, this highly sophisticated lock provides wide ranging protection against a number of forms of attack. It is also an ideal padlock for lock-off applications. Available in 6 colours, black, gold, blue, red, green, silver.

- Anodised aluminium body - superior weather resistance.
- Hardened steel shackle - extra protection against hacksaw and cropping attacks.
- Double ball bearing locking - extra strength to resist torsion and pull attack.
- Anti-pick - extra protection against picking.
- Anti-bump cylinder - further keyway protection.
- 2 keys per padlock.

145 Marine Padlocks

The 145 Marine padlock has been designed and manufactured to the highest standards to offer a secure padlock with exceptional weather resistance. The mirror chromed solid brass body, rust free internal components, 316 stainless steel shackle and rubber shackle seal combine to provide corrosion resistance in the most extreme environments. Security is paramount, with a double bolted shackle to resist torsion/pull attack and a 5 pin anti-pick cylinder designed to withstand manipulation. Range includes 40 and 50mm in standard and long shackle, both keyed to differ and keyed alike.

- Marine grade 316 Stainless Steel Shackle - extreme weather protection, tested to ISO 9227.
- Mirror chromed brass padlock - extreme weather protection.
- Rubber shackle seal - protects the cylinder from water ingress.
- Rust-free stainless steel and brass internal components.
- Double bolted locking mechanism - strength against torsion and pull attack.
- Anti-pick mushroom pins - protection against picking.
- Paracentric keyway - extra protection against manipulation.
- 2 keys per padlock.

150 Stainless Steel Padlock

Manufactured from a solid block of marine grade stainless steel, the robust Kasp 150 series is capable of meeting the stringent demands of high security industrial applications whilst offering the reassurance of an entirely corrosion resistant construction. The 5-pin anti-pick cylinder is designed to withstand intelligent picking and manipulation methods, whilst the 9mm stainless steel shackle is secured in the locked position by two ball bearings, universally accepted as one of the most secure locking mechanisms available.

- Stainless steel shackle - maximum protection against corrosion.
- Closed shackle - additional shackle protection to resist shackle attack.
- Double ball bearing locking mechanism - extra strength to resist torsion & pull attacks.
- Anti-pick mushroom pins - extra protection against picking.
- Rust-free internal components & drainage system - extra resistance against corrosion.
- Key retaining.
- Paracentric keyway - extra protection against manipulation.
- 2 keys per padlock.

160 Disc Padlocks

With a robust stainless steel body and exceptional design, the Kasp 160 series combines corrosion resistance and high security. In the locked position the distinctive shape protects the shackle from saw and cropping attack whilst the anti-drill (70mm only), anti-pick cylinder provides excellent protection to cylinder attack.

- Hardened Steel Shackle - extra protection against hacksaw & cropping attacks.
- Double bolted locking mechanism - extra strength to resist torsion & pull attacks.
- Stainless steel body - maximum resistance against corrosion.
- Anti-pick mushroom pins - extra protection against picking.
- Paracentric keyway - extra protection against manipulation.

180 Hardened Steel Padlocks

Manufactured from a solid block of hardened steel, the tough and durable Kasp 180 series has been specifically designed to meet the stringent demands of industrial applications, but is equally suited for high security domestic requirements. Featuring a 12mm hardened steel shackle, double ball bearing locking mechanism and a rekeyable 5 pin anti-pick cylinder, the Kasp 180 series offers a high level of protection against brutal and intelligent methods of attack. The fully chrome plated lock body and shackle ensures that the Kasp 180 series is ideal for outdoor use.

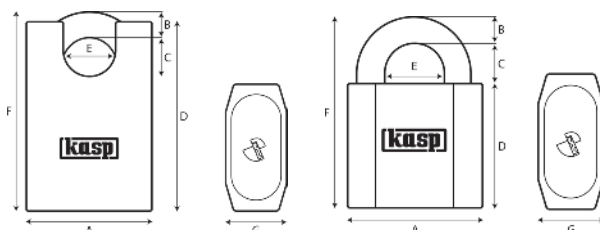

- Hardened Steel Shackle - extra protection against hacksaw & cropping attacks.
- Double ball bearing locking mechanism - extra strength to resist torsion & pull attacks.
- Chrome plated hardened steel body - extra strength & resistance against corrosion.
- 5 pin cylinder with anti-pick mushroom pins - extra protection against picking.
- Paracentric keyway - extra protection against manipulation.

190 High Security Padlocks

Renowned for their extreme strength, Kasp 190 series padlocks have been designed and manufactured in accordance with the stringent internationally recognised Central European Norm specifications. The closed shackle version conforms to BS EN 12320 : Grade

6, the highest grade within the Central European Norm security standard, ensuring it is amongst the most secure padlocks available today. Precision crafted from a solid block of high grade hardened steel, weighing over 1.5kgs (3.3lbs), the Kasp 190 Series is a true heavy weight that will resist the most brutal of attacks. The rekeyable, drill resistant 6-pin cylinder featuring anti-pick pins is designed to resist intelligent picking and manipulation methods, whilst the 14mm hardened boron steel shackle is secured in the locked position by 2 ball bearings, universally accepted as one of the most secure locking mechanisms available.

- Conforms to BS EN 12320: Grade 6 - amongst the most secure padlocks available today.
- Hardened Boron Alloy Steel Shackle - extra protection against hacksaw & cropping attacks.
- Double Ball Bearing Locking Mechanism - maximum strength to resist torsion & pull attacks.
- Pearl Nickel plated hardened steel body - extra strength & resistance against corrosion.
- 6 pin cylinder with anti-pick mushroom pins - extra protection against picking.
- Paracentric keyway - extra protection against manipulation.
- Drill resistant keyway - protects the cylinder against drill attack.
- 2 keys per padlock.
- Key retaining.

Shutter Locks

170 Brass Shutter Locks

The Kasp 170 series is ideal where a higher level of security is required. Originally designed for securing commercial shutters and grilles, this solid brass bodied lock offers excellent protection against cropping attack whilst the rotating hardened steel shackle makes hacksaw attack virtually impossible.

- Rotating Hardened Steel Shackle - extra protection against hacksaw & cropping attacks.
- Solid Brass Body - added resistance against corrosion.
- Anti-pick mushroom pins - extra protection against picking.
- Paracentric keyway - extra protection against manipulation.
- 2 keys per padlock.

175 Armoured Shutter Locks

With its ingenious design and reassuringly heavyweight construction, the Kasp 175 series offers a high level of resistance to virtually all conventional forms of attack. Its rotating hardened steel shackle makes hacksaw attack virtually impossible, and together with a ball bearing locking mechanism, hardened steel armoured jacket, anti-pick cylinder, and drill resistant keyway, the 175 series is extremely tough under attack.

- Hardened steel shackle - extra protection against hacksaw & cropping attacks.
- Double ball bearing locking mechanism - extra strength to resist torsion & pull attacks.
- Solid brass body encased in a steel jacket - extra strength & resistance against corrosion.
- Anti-pick mushroom pins - extra protection against picking.

Van Locks

500 Van Lock & Hasps

The design of the Kasp 500 Series Van Lock makes it almost impervious to conventional forms of attack. Specifically designed to meet the stringent demands of industrial vehicle applications, the Kasp 500 Series will resist the most savage of attacks. The high security anti-pick, 6-pin locking mechanism will resist intelligent picking and manipulation methods, whilst the walls of the hasp protect the heavyweight hardened steel lock offering virtually no points of effective attack.

- Chrome plated hardened steel body - extra strength and protection from corrosion.
- Shrouded steel shackle - maximum protection against hacksaw and cropping attacks.
- 6 Pin cylinder - extra protection against picking.
- Corrosion resistant mechanism - reliable in potentially harsh environment.

Hasp:

- Black powder coated heavy duty steel construction - extra strength and protection against corrosion.
- Supplied complete with fixing bolts - security and convenience.
- Integral storage bracket for secure storage of the lock when open.

Terms and Conditions

DEFINITIONS

The Buyer: the person, firm or company who purchases Goods from the Company. The Company: Carl Kammerling International Ltd. Goods: All items or services which the Company is to supply to the Buyer.

CONDITIONS

All orders are accepted by the Company subject to and in accordance with the following Conditions of Sale. All orders accepted by the Company are deemed to be under these Conditions and to the absolute exclusion of all other terms and conditions (including any which the Buyer purports to apply under any purchase order, confirmation of order, specification or other document). Each order or acceptance of a quotation for Goods by the Buyer from the Company shall be deemed to be an offer by the Buyer to buy Goods subject to these Conditions.

The sub-headings of these Conditions are for ease of reference only.

PRICES

Goods are invoiced at prices ruling on date of despatch and orders are accepted only on that basis. Prices are correct at time of printing. The Company reserves the right to change prices without prior notice. Any quotation given by the Company shall not be binding until the Company dispatches an acknowledgement of order to the Buyer. Any quotation is valid for a period of 30 days only from its date, provided that the Company has not previously withdrawn it.

Promotional orders will be delivered in a single delivery to the customer's normal trading address unless the Company decides to do otherwise.

DESPATCH OF GOODS AND DELIVERY

(a) UK: Free on orders of £80 net value of Goods when despatched to Buyers premises in UK mainland or Isle of Wight by the Company's normal method of carriage. Northern Ireland, Channel Islands, all UK offshore islands and any non-standard delivery addresses (i.e. not Buyer's own normal delivery address), delivered free of carriage on orders of £150 net value. When a special method of delivery is requested e.g. post, Parceline a.m. service, airfreight, Datapost etc., then carriage will be charged in full regardless of order value.

(b) Export: For details of freight & insurance, minimum order value and carriage, ask the Buyer's usual sales contact at the Company.

(c) Any dates specified by the Company for delivery of Goods are intended to be an estimate only and time for delivery shall not be of the essence.

(d) The Company may deliver the Goods by separate instalments and each separate instalment shall be invoiced and paid for in accordance with these Conditions.

(e) A charge will be made for any customer specific despatch documentation required.

PACKING

Cases and cartons are free and non-returnable.

TERMS OF PAYMENT

(a) UK: All Goods supplied shall be paid for within 25 days from the end of the calendar month in which they are invoiced by the Company.

(b) Export: For details please ask the Buyer's usual sales contact at the Company.

(c) Time for payment shall be of the essence.

(d) No payment shall be deemed to have been received until the Company has received cleared funds.

(e) Non-compliance with the Company's terms of payment shall constitute default without reminder. In case of default the Company may charge interest at the rate of one and a half percent per month from the date upon which the payment falls due until payment is made. In the event that the Buyer shall fail to fulfil the terms of payment in respect of any invoice the Company may in its sole discretion demand payment of all outstanding balances whether due or not, cancel all outstanding orders and/or decline to make further deliveries except upon receipt of cash or satisfactory security. The Company reserves the right to claim interest under the Late Payment of Commercial Debts (Interest) Act 1998.

(f) The Buyer shall not be entitled to withhold or set off payment of Goods delivered by virtue of any debt claim or allegation.

(g) Where any prices quoted are exclusive of VAT, VAT shall be payable in addition (where applicable) at the prevailing rate.

(h) The Company reserves the right to operate a minimum invoice charge.

(i) The Company reserves the right to operate a percentage deposit charge.

PASSING OF RISK

The risk in the Goods shall pass to the Buyer when the Company delivers the Goods in accordance with the terms hereof to the Buyer or other person to whom the Company has been authorised by the Buyer to deliver the Goods whether expressly or by implication and the Company shall not be liable for the safety of the Goods thereafter and accordingly the Buyer should insure the Goods thereafter against such risks as may be commercially prudent.

RESERVATION OF PROPERTY AND RIGHTS OF DISPOSAL – UK ONLY

(a) Until payment by the Buyer in full of the price for the Goods and any other monies payable to the Company:

(i) The Goods shall remain the sole and absolute property of the Company as legal and equitable owner.

(ii) The Buyer shall hold the Goods solely as a fiduciary for the Company and shall store the Goods separately from his own Goods or those of any other person and in a manner which makes them readily identifiable as the Goods of the Company and shall hold the proceeds of sale of the Goods in trust for the Company and shall keep them at all times identifiable as the Company's monies and shall not mingle them with other monies or pay them into an overdrawn bank account.

(iii) The Buyer shall insure the Goods against all normal commercial risk to their full replacement value with an insurance company of repute.

(iv) The Buyer's right to possession of the Goods shall terminate immediately if the Buyer has a bankruptcy order made against it, or makes an arrangement or composition with its creditors or otherwise takes the benefit of any statutory provision for the time being in force for the relief of insolvent debtors or (being a company) convenes a meeting of creditors (whether formal or informal), or enters into liquidation (whether voluntary or compulsory) except a solvent voluntary liquidation for the purpose only of reconstruction or amalgamation, or has a receiver and/or manager, administrator or administrative receiver appointed, or a resolution is passed or a petition presented for the winding up of the Buyer or for the granting of an administration order or any proceedings are commenced relating to the insolvency of the Buyer.

(b) The Buyer shall be deemed not to have paid the Company for Goods in the possession of the Company at any time unless the Buyer can prove that payment has been received by the Company.

(c) At any time prior to the payment in full of the price and other monies payable to the Company in respect of the Goods the Company or its agents may enter the premises of the Buyer and take possession of any Goods of which the Company is the owner and remove and dispose of them as the Company sees fit and the Buyer gives the Company an irrevocable licence to enter upon its premises for such purpose.

(d) The Company shall be entitled to recover payment for the Goods even though ownership has not passed from the Company.

MERCHANDISERS

Any merchandisers and merchandising sundries supplied by the Company remain the property of the Company and can be recalled at any time.

CARL KAMMERLING INTERNATIONAL GUARANTEE AND WARRANTY

All products are provided with a guarantee against faulty materials and/or workmanship. Carl Kammerling offer the following manufacturers guarantee to end users that purchase goods from the buyer:

BRAND:

Jokari	12 months
Kasp	120 months (10 years) some product exceptions apply (12 months guarantee applies on all electronic security products).
Clipacore	12 months

Any faulty products will be replaced or repaired free of charge at the discretion of the Company in accordance with the relevant guarantee if found to be faulty, unless the fault is due to wear and tear, misuse or careless handling, accident or neglect and provided:

- the products are returned immediately to the Company at the Buyer's cost;
- proof of purchase within the guarantee period is provided;
- the reason for the return is clearly stated.

This guarantee is in addition to and in no way prejudices your contractual or statutory rights.

The Company is not liable for the following: Any direct consequential loss or damage of anything whatsoever (including, without limitation, loss of profits, revenue or contracts, pure economic loss or similar loss) or for any damage to or destruction of any property, injury to or death of any person, except to the extent that such injury or death is caused by the negligence on the part of the Company or its employees; costs, damages, charges or expenses caused directly or indirectly by any delay in the delivery of the Goods (even if caused by the Company's negligence) any Goods which have been repaired or altered in any way, any Goods which have been subject to accident or damage or which have been maintained, stored or used improperly; unsuited, inappropriate and faulty application or treatment, normal wear and tear due to use.

All samples, drawings, descriptive matter, specifications and advertising issued by the Company and any descriptions or illustrations contained in the Company's catalogues or brochures are issued for guidance purposes only to give an approximate idea of the Goods described in them and do not form part of these Conditions.

CLAIMS

THE BUYER IS REQUIRED TO NOTIFY THE COMPANY BY TELEPHONE AND THEN CONFIRM IN WRITING REGARDING:

(a) NON DELIVERY

To the Company within 3 days of receipt of invoice which is sent to the Buyer on the day following dispatch of Goods.

(b) SHORTAGES

To the Company immediately.

(c) PILFERAGE AND DAMAGE

To the Company and its carriers within 24 hours of receipt of Goods. Carriers' sheet to be endorsed with details of open or damaged cartons.

IT IS EMPHASISED THAT DELAY BY THE BUYER MAY CAUSE THE COMPANY'S CLAIM TO BE REJECTED BY THE CARRIERS. IN THIS EVENT THE COMPANY WOULD NOT ACCEPT ANY RESPONSIBILITY FOR LOSS.

(d) INVOICE QUERIES

To the Company within 30 days of receipt of invoice.

(e) The Company shall not be liable for any non-delivery of Goods (even if caused by the Company's negligence) unless the Buyer has so notified the Company in accordance with the above provisions.

(f) Any liability of the Company for non-delivery of the Goods shall be limited to replacing the Goods within a reasonable time or issuing a credit note against any invoice raised for such Goods.

LIMITATION OF LIABILITY

(a) Subject to the provisions of paragraph (b) of this Condition it is expressly stipulated that in the event of any claim on any ground being made by the

Buyer against the Company in respect of the Goods or any matter arising from or in relation to the contract relating thereto the liability the Company shall be limited (in respect of each claim or series of connected claims) to the invoice value of the Goods and under no circumstances shall the Company be under any further liability to the Buyer whether for loss of profit or for any direct or consequential loss howsoever arising.

(b) Notwithstanding any provisions herein contained nothing in these Conditions shall operate or be construed as operating to exclude or restrict any liability of the Company for death or personal injury resulting from the negligence of the Company.

(c) Whilst every care is taken in handling Goods by the Company's employees liability is excluded for any damage to such Goods by any cause whatsoever.

(d) On electrical devices liability is excluded for any unforeseen circumstances brought about by power failure or spiking (not notified to the Company before installation of the equipment).

RETENTION OF DOCUMENTS

The Company will retain all documents relating to orders etc. for a maximum period of 2 years.

RETURNS

Goods supplied correctly to Buyer's order cannot be accepted for return or exchange unless by prior agreement in writing and a minimum 10% handling charge will be made.

SPECIFICATION

Due to the Company's policy of continuous improvement it reserves the right to alter specifications without prior notice. The Company also reserves the right to substitute items which have been discontinued or improved with the replacement model.

PREVIOUS CONDITIONS

If at any time one or more of the above conditions becomes in whole or in part invalid, illegal or unenforceable in any respect under any law the validity, legality and enforceability of the remaining provisions thereof and of the other Conditions herein shall not in any way be affected or impaired thereby.

STANDARD QUANTITIES

The column headed 'box qty' in the catalogues and price lists indicates the number of items contained in outer cartons. The Company reserves the right to amend the Buyer's order quantities to the nearest outer carton quantity.

FORCE MAJEURE

The Company reserves the right to defer the date of delivery or to cancel any order for Goods or to reduce the volume of Goods delivered without liability to the Buyer if it is prevented from or delayed in the carrying on of its business due to circumstances beyond its reasonable control, including (without limitation), acts of God, governmental actions, war or national emergency, acts of terrorism, protests, riot, civil commotion, fire, explosion, flood, epidemic, lock-outs, strikes or other labour disputes (whether or not relating to either party's workforce), or restraints or delays affecting carriers or inability or delay in obtaining supplies of adequate or suitable materials, provided that, if the event in question continues for a continuous period in excess of 3 months, the Buyer shall be entitled to give notice in writing to the Company to cancel the order.

GOVERNING LAW

All contracts shall be governed by English Law. In the event of any dispute whether of interpretation or otherwise or as the liability either of the Company or the Buyer arising out of the sale, use or operation or failure to operate the Goods or of any part thereof the same shall be determined by English Courts of Law to whose jurisdiction the Company and the Buyer hereby submit.

GENERAL

(a) Each right or remedy of the Company under these Conditions is without prejudice to any other right or remedy of the Company, whether under these Conditions or otherwise.
